

The Summit Next Gen is not just an event; it's a catalyst for transformational leadership all year long.

365 Leadership will provide ongoing leadership development through leadership shorts, blogs, social media posts and actionable items that are all created for reflection for the individual leader or discussion if they are in a leadership small group. Host sites will be able to unlock 365 leadership resources that can help them build that transformational leadership community the rest of the year.

Many of the 365 resources are based upon the Summit Next Gen speakers, but we will also be introducing you to other youth leadership resources to further enhance and build your transformational leadership community.
